## ABOUT AUXO INDUSTRIES

Auxo Industries is a pioneering name in the field of agricultural and industrial chemical solutions, committed to advancing sustainable farming and animal health. As a trusted manufacturer and supplier, we specialize in a comprehensive range of high-quality products including agrochemicals, micronutrients, herbicides, fungicides, bactericide, plant growth regulators, veterinary medicines, and a variety of industrial chemicals. At the heart of our innovation lies nano technology, which we utilize to enhance the efficiency, absorption, and effectiveness of our products. This advanced approach allows for precision-targeted application, reduced environmental impact, and improved crop yield and livestock health. We offer our solutions in convenient and efficient packaging formats such as ampules, vials, and tablets, designed to meet the diverse needs of farmers, veterinarians, and industrial users. Our packaging ensures product stability, ease of use, and long shelf life. Driven by our core vision of cost-effectiveness and sustainable agriculture, Auxo Industries is dedicated to empowering farmers and agribusinesses with tools that support long-term productivity and ecological balance. With a strong focus on quality, innovation, and customer satisfaction, we strive to be a partner in progress for the global agricultural and veterinary sectors.

## FLOMAX

ANTI TRANSPARENTS WITH FEMALE FLOWER BOOSTER

- ✓ It increases the number of female flowers.
- ✓ Increasing yield by at least 30-40%.
- ✓ It also reduces the flower and fruit dropping
- ✓ Increase Fruit Size
- ✓ Suitable for all types of Vegetables and horticulture crops

FLOMAX is a unique herbal formulation that increases the number of female flowers. This results in more fruit formulation and hence the ultimate yield increases by at least 30-40%. FLOMAX also reduces the flower and fruit dropping. FLOMAX is very useful for all types of Vegetables esp creepers, horticulture crops like Pomegranate, Papaya, Mango, Citrus, Watermelon etc. It helps in hormone biosynthesis that are necessary for maximum flowering enhancement. The plants have a greater number of female flowers which will be further converted to fruits Storage And Disposal: Store out of sunlight in a cool, dry area in accessible to children or pets. Rinse container and discard after use in accordance with local, state and federal regulations.

Dilute 10 ml FLOMAX in 200ltrs of water for foliar application. FLOMAX can be applied during all stages in vegetables, horticulture, floriculture etc. Content :Organic Manure containing high value Gibberellin. Note: All active constituents are exempt from registration under CIB or FCO.

## CYTOX

ORGANIC MANURE WITH NATURALLY OCCURRING CYTOKININ

- ✓ Promoting Cell Division and Growth
- ✓ Influencing Plant Development
- ✓ Improves better Flowering
- ✓ Delaying Senescence and Extending Lifespan
- ✓ Plant-Microbe Interactions
- ✓ Improves better fruit setting

CYTOX is an organic Manure containing high amounts of cytokinin. CYTOX helps in promoting cell division. When used with cytokinin, fruit's shape can be improved. CYTOX stimulates the following effects: laterrel bud emergence (apples, oranges); basal shoot formation (roses, orchids); flowering (cuclamen, cacti); fruit set (grapes, oranges, melons). It promote deliver of amino acid, inorganic salt and growth regulators to applied positions. It helps plant to keep green and retard aging. It can be used in agriculture, horticulture, for plants at different stages; from germination to harvest. This unique combination is derived by using alfalfa grass and Maize during the organic manure formation process. CYTOX also acts as a thinner when applied shortly after bloom. Compared to other chemical thinners, it reportedly will increase fruit size beyond what would occur during the normal crop-thinning process. The product should be applied in the morning or evening when conditions are best for slow drying. Storage And Disposal: Store out of sunlight in a cool, dry area in accessible to children or pets. Rinse container and discard after use in accordance with local, state and federal regulations.

Dilute 10 ml CYTOX in 200ltrs of water for foliar application. CYTOX can be applied during all stages in vegetables, horticulture, floriculture etc.

## YIELDX

ANTI-TRANSPIRANTS WITH YIELD ENHANCER

- ✓ Increase Fruit Size
- ✓ Improved fruit set and reduced fruit drop
- ✓ Increase fruit weight and yield
- ✓ Higher sugar (Brix) content
- ✓ Enhanced colour, texture and shine of fruits
- ✓ Uniformity in shape, size, and fruit quality
- ✓ Enhanced taste in fruits with a stronger fragrance
- ✓ Increase shelf life to assist in export transportation

YIELDX greatly increases Chlorophyll Content by increasing Photosynthesis Activity. It Increases Cell Division in plants and the activity of plant peroxidase, which is known to play an important part in increasing a plant's defences against disease causing pathogens. YIELDX also increases the activity of Nitrate Reductases which is one of the most important enzymes in the assimilation of exogenous nitrate - the predominant form of nitrogen available to green plants. It also plays an important role in plant extension, ROOT development and regulates balance of nutrition in plants. YIELDX shows excellent results in increasing the yields in various crops. Along with plant growth, there is a significant increase in flavour and colour of fruits. YIELDX also increases immunity and plants Stress Tolerance Capacity. Storage And Disposal: Store out of sunlight in a cool, dry area in accessible to children or pets. Rinse container and discard after use in accordance with local, state and federal regulations.

Dilute 10 ml YIELDX in 200 ltrs of water for foliar application. YIELDX can be applied during all stages in vegetables, horticulture, floriculture etc.

## TOP GIB

ORGANIC MANURE WITH NATURALLY OCCURRING GIBBERELLIN

- ✓ Improves Fruit Setting
- ✓ Produce Uniform Seedling
- ✓ Promote Cell Elongation
- ✓ Increase Fruit Size
- ✓ Advance Flowering And Increase The Yield

TOP GIB is an organic Manure containing high amounts of gibberellin. TOP GIB helps in promoting cell division. When used with gibberellins, fruit's shape can be improved. TOP GIB stimulates the following effects: cell division; lateral bud emergence (apples, oranges); basal shoot formation(roses, orchids); flowering (cuclamen, cacti); fruit set (grapes, oranges, melons). It can inhibit degradation of chlorophyll, nucleic acid and protein; promote delivers of amino acid, inorganic salt and growth regulators to applied positions. It helps plant to keep green and retard aging. Storage And Disposal: Store out of sunlight in a cool, dry area in accessible to children or pets. Rinse container and discard after use in accordance with local, state and federal regulations.

Dilute 10 ml TOP GIB in 200ltrs of water for foliar application. TOP GIB can be applied during all stages in vegetables, horticulture, floriculture etc.

## ALPHA X

- ✓ Improved Metabolic Function
- ✓ Enhanced Stress Tolerance
- ✓ Boosted Enzyme Activity
- ✓ Increased Growth and Yield
- ✓ Support for Hormonal Balance

Alpha X is an innovative agro-nutrient product designed to enhance crop health and productivity through advanced nano-technology. The key active ingredient in Alpha X is Vitamin B12, formulated at the nano scale to maximize bio availability and uptake by plants.

This nano-form of Vitamin B12 ensures more efficient absorption at the cellular level, promoting faster growth, improved metabolic activity, and stronger resistance to environmental stress. Designed specifically for field applications, Alpha X is highly concentrated and effective at a low dosage of just 10 mL per acre, making it both cost-effective and easy to integrate into existing farming practices. The product is compatible with common delivery methods, including foliar spray and drip irrigation systems, allowing flexibility for farmers. The packaging will clearly highlight the benefits of nano-technology, the precision dosage, and the eco-friendly nature of the formulation.

Dilute 10 ml Alpha X in 200ltrs of water for foliar application. Alpha X can be applied during all stages in vegetables, horticulture, floriculture etc.

## ADINOZYN

- ✓ Improves fruit quality
- ✓ Strengthen cell wall structure
- ✓ Increases disease resistance Capacity
- ✓ Promotes proper plant cell elongation
- ✓ Has a role in the regulation of the stomata
- ✓ Participates in enzymatic and hormonal Process

Adinozyn is an anti transpirants based Plant growth regulator. Adinozyn is a class of growth regulator that promotes cell division. When used with gibberellins, fruit's shape can be improved. Adinozyn stimulates the following effects: cell division; lateral bud emergence (apples, oranges); basal shoot formation (roses, orchids); flowering (cyclamen, cacti); fruit set (grapes, oranges, melons). It can inhibit degradation of chlorophyll, nucleic acid and protein; promote delivery of amino acid, inorganic salt and growth regulators to applied positions. It helps plant to keep green and retard aging. It can be used in agriculture, horticulture, for plants at different stages; from germination to harvest. Adinozyn also acts as a thinner when applied shortly after bloom. Compared to other chemical thinners, it reportedly will increase fruit size beyond what would occur during the normal crop-thinning process. Adinozyn can also be used to regulate plant growth, it can aid in stopping the shoot growth and promote lateral growth or branching.

Dilute 10 ml Adinozyn in 200ltrs of water for foliar application. Adinozyn can be applied during all stages in vegetables, horticulture, floriculture etc.

## ROOT MAX

- ✓ Faster Rooting: See visible results sooner.
- ✓ Stronger Roots: For healthier, more resilient plants.
- ✓ Higher Success Rates: Propagate with confidence.
- ✓ Easy to Use: Simple application for all skill levels.

Root Max is a powerful rooting hormone formulated to accelerate root development in plants. Our advanced formula ensures faster establishment, stronger Hairy root systems and increased success rates for propagation. This Breakthrough technology product give maximum results by using just 10ml per Acre owing to a Nano-Technology used.

Dilute 10 ml Root Max in 200ltrs of water for foliar application. Root Max can be applied during all stages in vegetables, horticulture, floriculture etc.

## OUR EDGE: Advanced Nanotechnology

At Auxo Industries, innovation is at the core of everything we do. One of the most powerful tools we employ is nanotechnology, which revolutionizes the way agrochemicals and veterinary medicines are developed, delivered, and absorbed. Our nano-based formulations are engineered at the molecular level to provide maximum efficiency with minimum input. Unlike conventional products, nano-sized particles penetrate deeper and more effectively into plant tissues or animal systems, ensuring faster and more targeted action.

### Key Benefits of Our Nano technology-Based Solutions:

- \* **Enhanced Absorption & Uptake:** Nano-sized particles improve the bioavailability of nutrients and active ingredients, allowing plants and animals to absorb them more efficiently.
- \* **Controlled Release:** Our nano-formulations allow for slow and sustained release of active compounds, reducing the frequency of application and minimizing waste.
- \* **Reduced Dosage Requirements:** Due to their superior effectiveness, our nano-products require smaller doses compared to traditional alternatives-making them more economical and environmentally friendly.
- \* **Eco-Safe and Sustainable:** Nano technology minimizes leaching into the soil and water, supporting long-term soil health and environmental sustainability.
- \* **Compatibility and Stability:** Our nano-encapsulated compounds are stable across a wide range of pH and environmental conditions, ensuring consistent performance in the field.

### Applications Across Our Product Range:

We incorporate nano technology in various products, including:

- \* Micro nutrient blends for faster nutrient correction
- \* Nano-herbicides and fungicides for precise weed and disease
- \* Nano-bactericides for effective plant protection
- \* Plant growth regulators that work efficiently at micro-doses
- \* Veterinary medicines designed for improved absorption and bio activity

Through continued investment in research and development, Auxo Industries remains at the forefront of next-generation agriculture and animal health-offering solutions that are smart, sustainable, and science-driven.
